PROJECTS

Travel website Development

- Developed a fully responsive travel website using HTML, CSS, and JavaScript, featuring modern UI elements like dark mode, animations, and smooth navigation. Integrated interactive functionalities including a booking system and dynamic filtering for rooms and destinations to enhance user experience.

Blind Assistance System using YOLOv8

- Blind Assistance system uses YOLOv8 for real-time object detection ,converts detected objects into text to speech with distance and direction which helps visually impaired individuals.

College Help Chatbot

- Developed a full-stack AI-powered College Help Chatbot using Java Spring Boot, MySQL, and JavaScript with JWT authentication and admin features. Implemented a hybrid response system combining database search with Groq AI, along with chat history tracking and feedback analytics.
